

INSTALLATION MANUAL

Modular Access Systems

Modular Access Systems

KATT Safety leads the industry in the design, installation and management of access and fall protection safety systems.

Modular Access Systems is a proprietary modular stair and platform system designed to allow on-site assembly and customisation to suit exact site parameters, reducing design and delivery lead times considerably.

Modular Access Systems is the safest solution for access and fall protection whilst accessing and maintaining elevated systems and equipment.

- 1 Guardrail and Walkway
- 2 Skylight protectors
- 3 Rung ladders
- 4 Access Hatches
- 5 Modular Access Systems
- 6 Step Ladders

Features

Modular Advantages

VARIABLE STAIR ANGLE & TREAD SPACING

Modular Access Systems stairs can be adjusted to suit the required stair angle whilst allowing each individual tread to be leveled and spaced accordingly. This minimises pre-installation precise on-site measurement and fabrication requirements resulting in significant time savings.

PATENTS AND DESIGN REGISTRATIONS APPLY

PRODUCT FEATURE

UNIQUE

Installation Requirements

MUST BE READ PRIOR TO USE

- 1. This system must only be installed by competent persons trained in the selection, use and maintenance of access systems.
- 2. Persons installing this system are required to have a comprehensive knowledge of the British & EU Standards, codes of practice and industry guidelines that relate to the selection, use and maintenance of access and fall protection systems and equipment.
- 3. Integrity and suitability of the structure to which Modular Access Systems is attached must be approved by a structural engineer unless it is clear to a competent person as to the suitability of the support structure.
- Read installation and operating instructions carefully before commencing any work. Consent to deviate from the installation guide must be obtained in writing from the manufacturer.
- Conduct an initial work/risk assessment, and take all reasonable precautions to eliminate or control potential hazards and risks during the installation of this product.
- 6. Complete all necessary H&S documentation, including a Job Safety Analysis and Work Method Statement and obtain consent from responsible person in workplace prior to commencement of work.
- Installers must possess valid industry licenses, be appropriately trained, and comply with all relevant H&S legislation prior to installation of this product.
- 8. Do not modify or remove any element of the support structure without prior authorisation by a qualified engineer.

- 9. Decorative coatings and coverings must be removed to ensure correct evaluation of structure prior to attachment of system.
- 10. Any re-routing of electrical and/or other services must be carried out by qualified or authorised personnel.
- 11.Appropriate temporary access and safety equipment must be used during installation, such as platform ladders or scaffolding and fall protection anchorage points.
- 12. In case of emergency, access and fall protection systems must be installed by a minimum of two persons.
- 13.Do not tamper with, modify or remove any part this system unless authorised by the manufacturer in writing.
- 14. Appropriate labels or markings must be attached to each system and include the following:
 - System for personnel use only
 - Service entry date
 - Next examination/service due date
 - Maximum designed load ratings
 - Installer/Certifier contact details
- 15.Documentation confirming correct use and maintenance of the system and equipment must be provided to the workplace manager on completion of installation.

MODSAFE GROUP instructions and recommendations, drawings and diagrams, and all other documentation are copyright, errors and omissions excepted, and must be carefully read and implemented. Any assistance or guidance given is without prejudice, and MODSAFE GROUP cannot be held responsible for any inaccuracy or misinterpretation whatever. Failure to follow site installation requirements and warnings, may result in serious injury or death. MODSAFE GROUP accepts no direct or indirect responsibility and/or consequential liability whatever, for any products and systems incorrectly installed or certified. MODSAFE GROUP cannot warrant the integrity or suitability of the structure to which the products may be attached. Prior assessment must be made by a qualified structural engineer, unless the structure is authorised or approved by a competent person.

Limitations

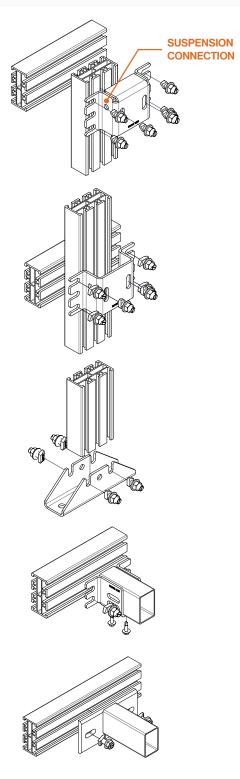

MUST BE READ PRIOR TO USE

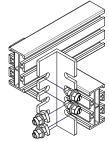

- 1. Modular Access stairway and platform system is rated to 2.5kPa live load (250kg/m²).
- 2. Modular Access Systems platforms are designed for a maximum free standing height of 6000mm. Taller platforms are achievable based on engineer's specifications.
- 3. In UK Building Regs Part K 16 stair treads maximum. In BS EN ISO 14122-3 In the case of a single straight flight the climbing height shall not exceed 4m. In case of multiple flights, the climbing height of the individual stairs shall not exceed 3m and a landing is necessary before continuing on to another flight.
- 4. Platform deflection has been based on two variables, moderate deflection and minimal deflection. Moderate deflection is calculated using span length divided by 100mm. Minimal deflection is calculated using span length divided by 200mm.
- 5. Deflection is based on a uniformly distributed load combination of dead load + 0.7 live load. (G+0.7Q)
- 6. Modular Access Systems platform is not designed for dead loads other than self weight. Please consult with the MODSAFE team for these design scenarios.

- 7. Correct lock off position of T-Bolt is critical to ensure integrity of system. The slot in the T-Bolt must be perpendicular to the extrusion slot.
- 8. Not suitable for Building Regulations Part M (General Public Access). This system is designed for industrial and maintenance access only.
- 9. Decorative coating and coverings must be removed to ensure correct evaluation of structure prior to attachment of system.
- 10.Do not tamper with or make alterations to system components without manufacturer's consent.
- 11. This system is not to be used for tethering, lifting machinery or equipment.
- 12. The access system must be checked by a competent system inspector as recommended:
 - Non corrosive/mild environment 12 monthly
 - Corrosive/harsh environment 6 monthly
 - (more frequent inspection may be required).

MODSAFE GROUP recommends that persons working at heights do not work alone in case of an emergency and help is required. Should any part of the system/equipment have been subjected to abnormal loading, use must be discontinued until replaced/ recertified by a competent person.

NAME	Modular Access Systems 80 Top Support Bracket
PRODUCT CODE	KB021
MATERIAL	Powder coated stainless steel
USE	Connects Modular Access Systems 80 post to platform
NOTE	If this bracket is used to support a suspended platform, drill M11 hole through extrusion using bracket suspension hole as a guide. M10 bolt is required to be used.

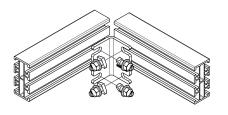

NAME	Modular Access Systems 80 Post Through Bracket
PRODUCT CODE	KB022
MATERIAL	Powder coated stainless steel
USE	Connects Modular Access Systems 80 post to platform

NAME	Modular Access Systems 80 Base Support Foot
PRODUCT CODE	KB026
MATERIAL	Powder coated stainless steel
USE	Secures Modular Access Systems post to ground

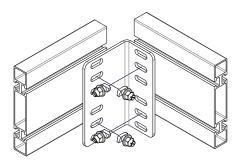

NAME	Modular Access Systems 80 Horizontal Support Bracket
PRODUCT CODE	KB012
MATERIAL	Powder coated stainless steel
USE	Fixes platform cross supports to platform stringers

NAME	Modular Access Systems Platform Cross Support
PRODUCT CODE	KB060
MATERIAL	Aluminium
USE	Supports and secures platform

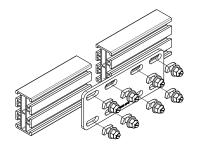

NAME	Modular Access Systems Joist To Bearer Bracket
PRODUCT CODE	KB004
MATERIAL	Aluminium
USE	Connects Modular Access Systems 80 joist to bearers

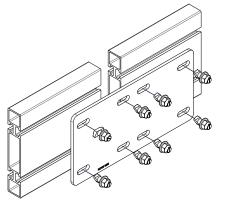

NAME	Modular Access Systems 80 Angle Bracket
PRODUCT CODE	KB013.80
MATERIAL	Powder coated stainless steel
USE	90° Modular Access Systems 80 corners

100400 1745	

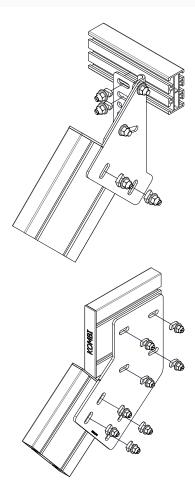

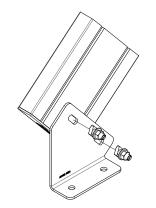

100 Alig	gleBracket
PRODUCT CODE KB013:	180
MATERIAL Powde	r coated stainless steel
USE 90° Mo	dular Access Systems 180 corners

NAME	Modular Access Systems 80 Angle Bracket Kit 45°
PRODUCT CODE	KB015.80
MATERIAL	Powder coated stainless steel
USE	Modular Access Systems 45° angle corners

NAME	Modular Access Systems 80 Post Joining Plate
PRODUCT CODE	KB016.80
MATERIAL	Aluminium
USE	Joins Modular Access Systems 80 extrusion

NAME	Modular Access Systems 180 Joining Plate
PRODUCT CODE	KB016.180
MATERIAL	Aluminium
USE	Joins Modular Access Systems 180 extrusion

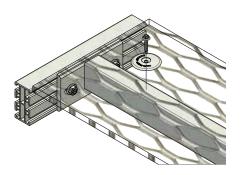

NAME	Modular Access Systems Stair Mounting Adjustable Bracket
PRODUCT CODE	KB031
MATERIAL	Powder coated stainless steel
USE	Connects stair stringer to platform structure
NOTE	Stairs can be angled from 30° to 44°. For best flexibility, install stair at 40°.

NAME	Modular Access Systems Stair Bridge Mounting Plate
PRODUCT CODE	KB014
MATERIAL	Powder coated stainless steel
USE	Connects stair stringer to platform structure

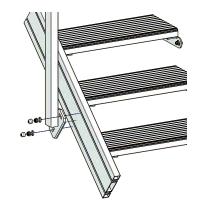

NAME	Modular Access Systems Stair Tread Connection Bracket
PRODUCT CODE	KB019
MATERIAL	Aluminium
USE	Connects stair tread to stringers
NOTE	Maximum 17 treads / 18 risers in a single stair as per AS/NZS 1657.

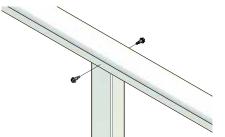

NAME	Modular Access Systems Stair Foot 180mm Adjustable
PRODUCT CODE	KB034
MATERIAL	Powder coated stainless steel
USE	Connects stair stringer to ground

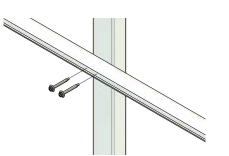

NAME	Modular Access Systems Platform Deck
PRODUCT CODE	GW335
MATERIAL	Aluminium
USE	Provides walkway deck for platforms
NOTE	Platform maximum opening sizes no more than 15mm where possibility of persons accessing underneath. Use narrow mesh walkway deck in this application.

NAME	Modular Access Systems Platform Guardrail Post
PRODUCT CODE	KB603S
MATERIAL	Aluminium
USE	Supports guardrail system

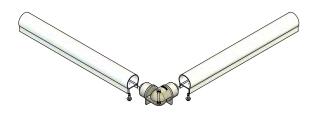

NAME	Modular Access Systems Stair Handrail Post
PRODUCT CODE	KB601L (Left) & KB601R (Right)
MATERIAL	Aluminium
USE	Supports handrail system

NAME	Modular Access Systems Guardrail / Handrail
PRODUCT CODE	GW374
MATERIAL	Aluminium
USE	Provides barrier / handrail for platform and stair

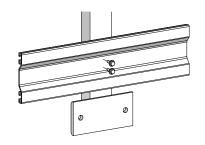

NAME	Modular Access Systems Kneerail
PRODUCT CODE	GW375
MATERIAL	Aluminum
USE	Provides barrier / handrail for platform and stair

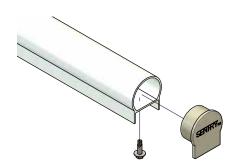

NAME	Kneerail Elbow Corner
PRODUCT CODE	GW383 (Kneerail)
MATERIAL	Die Cast Aluminium
USE	Connects rails together at corners
NOTE	Corners are adjustable to suit on-site requirements.

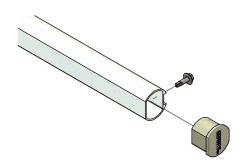

NAME	Modular Access Systems Handrail Elbow
PRODUCT CODE	GW382 (Handrail)
MATERIAL	Die Cast Aluminium
USE	Connects rails together at corners
NOTE	Corners are adjustable to suit on-site requirements.

NAME	Modular Access Systems Toe Board 100 x 25 C Section			
PRODUCT CODE	GW320			
MATERIAL	Aluminium			
USE	Prevents objects from sliding off platform			
NOTE	A maximum gap of 10mm is allowed between platform deck and underside of toe board.			

NAME	Modular Access Systems Handrail End Cap	
PRODUCT CODE	GW378	
MATERIAL	Die Cast Aluminium	
USE	Caps exposed ends of handrail	

NAME	Modular Access Systems Kneerail End Cap	
PRODUCT CODE	GW379	
MATERIAL	Die Cast Aluminium	
USE	Caps exposed ends of kneerail	

Fixings & End Caps

NAME	Modular Access Systems T-Bolt (M10)		
PRODUCT CODE	KB005		
MATERIAL	Stainless steel		
USE	Fixes all brackets and plates in the Modular Access Systems system		
NOTE	Slot on T-Bolt must be perpendicular to extrusion slot to ensure correct insertion.		

NAME	Modular Access Systems T-Bolt Nut Cap	
PRODUCT CODE	SD935K.10 (Included with Modular Access Systems T-Bolt)	
MATERIAL	High density plastic	
USE	Caps all exposed T-Bolt ends	

NAME	Modular Access Systems 80 End Cap	
PRODUCT CODE	KB092.80	
MATERIAL	High density plastic	
USE	Caps exposed ends of Modular Access Systems 80 extrusion	

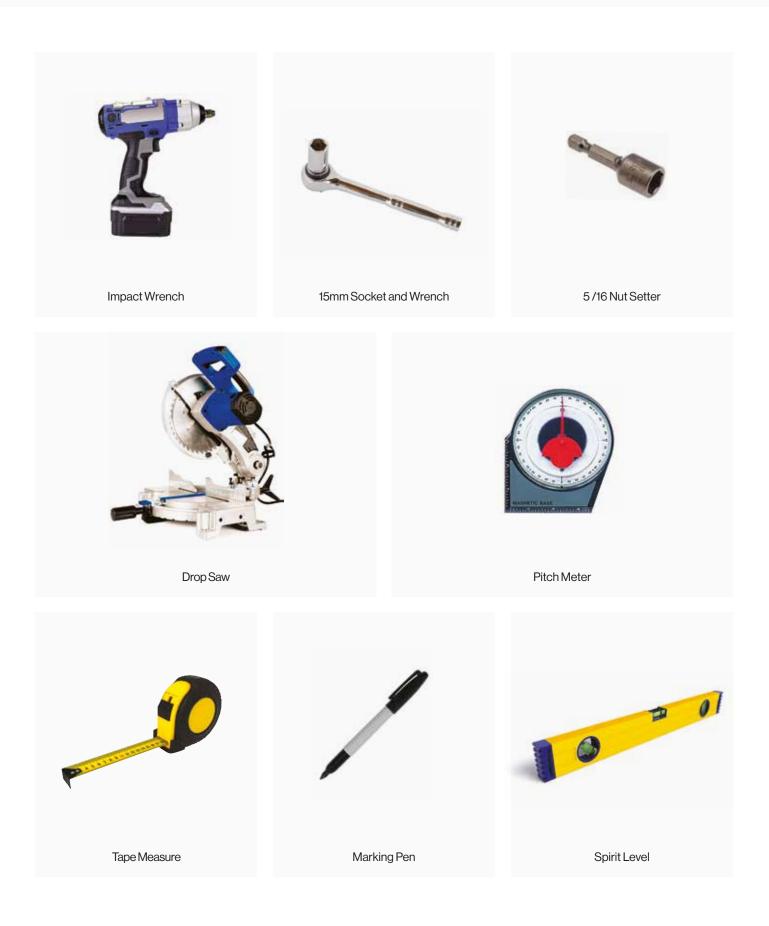

NAME	Modular Access Systems 180 End Cap
PRODUCT CODE	KB092.180
MATERIAL	High density plastic
USE	Caps exposed ends of Modular Access Systems 180 extrusion

NAME	Modular Access Systems Certification Plate	
PRODUCT CODE	SD970 Modular Access Systems	
MATERIAL	Aluminum	
USE	Identifies install & certification information	

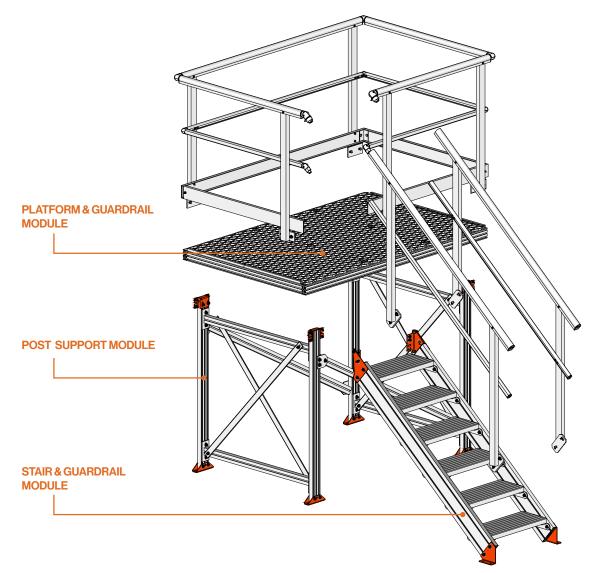

Tools & Equipment

System Assembly

MODULAR ACCESS SYSTEMS IS MADE UP OF 3 PRIMARY MODULES:

- Post support module assembled first
- · Platform module assembled second
- Stair module assembled third

VIEW STAIRWAY ASSEMBLY VIDEO

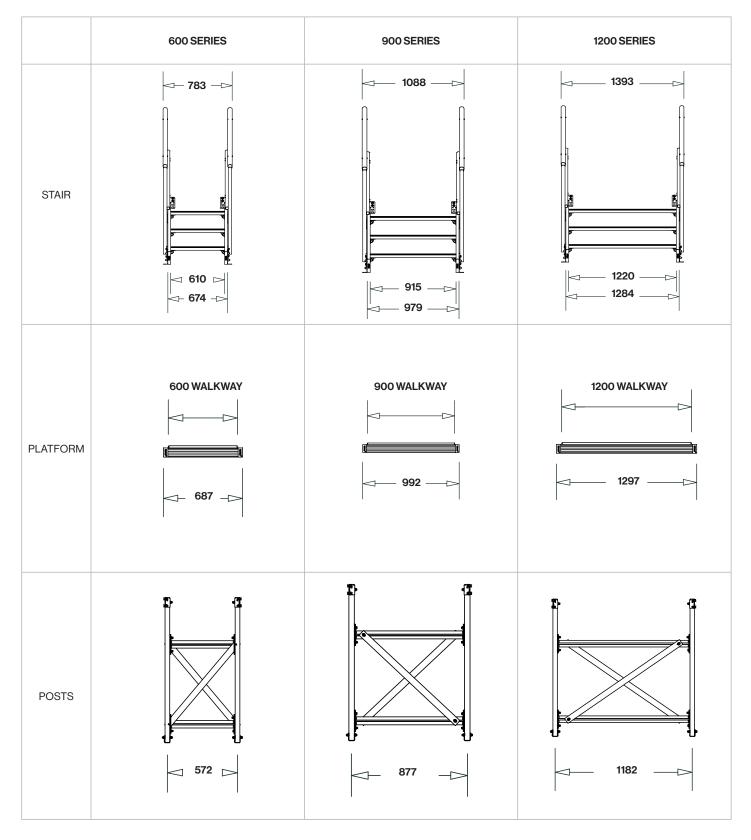

VIEW GUARDRAIL ASSEMBLY VIDEO

Dimensions

MODULAR ACCESS SYSTEMS DIMENSIONS

- Modular Access Systems are available in three standard widths, 600 series, 900 series and 1200 series. Exact dimensions are shown below.
- Custom widths can be designed and built to suit specific site requirements. (Additional lead times may be required.)

T-Bolt Assembly

MODULAR ACCESS SYSTEMS T-BOLT

- The Modular Access Systems T-Bolt is an M10, 316 stainless steel assembly designed for the Modular Access Systems system.
- A slot on the end of the bolt is a visual aid to ensure correct lock position once inserted into the extrusion slot.

INSTALLATION REQUIREMENTS

- It is recommended that an impact wrench gun be used to tighten fixings.
- T-Nut tightening torque: 60 Nm.

MODULAR ACCESS SYSTEMS T-BOLT INSERTION

- Undo the nut to the extent of the bolt.
- Install T-Bolt & tighten.
- Ensure correct T-Bolt lock position by checking the slot on the end of the bolt is perpendicular to the extrusion slot.

MODULAR ACCESS SYSTEMS T-BOLT CORRECT POSITION

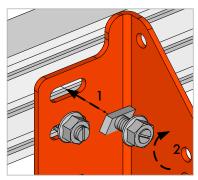

• Slot perpendicular to extrusion slot.

MODULAR ACCESS SYSTEMS T-BOLT INCORRECT POSITION

• Slot NOT perpendicular to extrusion slot.

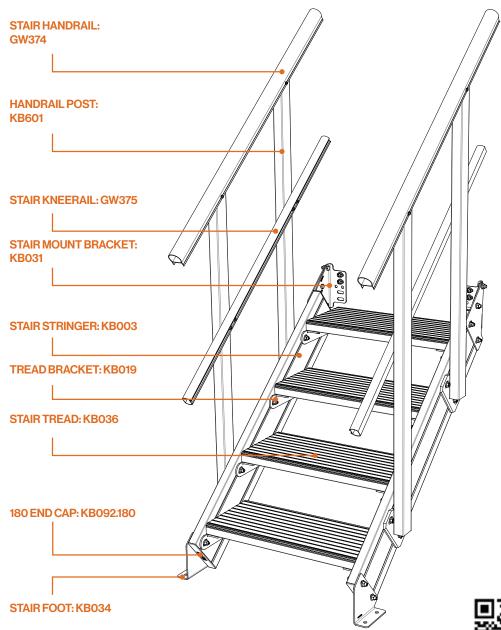

Stair Assembly

MODULAR ACCESS SYSTEMS STAIR MODULE

- Modular Access Systems stairs are designed to support a load of 2.5 kPa live load (250kg/m²)
- Modular Access Systems stairs are designed to best suit a 40° angle however are suitable for angles from 25° 45°.
- Modular Access Systems stairs are available in three standard internal widths: 610mm, 915mm & 1220 mm. Custom widths can be manufactured.

INSTALLATION REQUIREMENTS:

- Minimum inside distance between stair stringers to be not less than 600mm.
- · Clear width between handrails to be no less than 550mm.
- The number of treads in a flight must not be less than 2 or greater than 17.
- Treads are allowed a maximum of 5mm variation in spacing as per AS1657: 2018.

VIEW STAIR ASSEMBLY VIDEO

STEP 1: POSITION & FIX TREAD SUPPORT BRACKETS TO BOTH STRINGERS

STEP 2: ATTACH TOP TREAD FIRST TO LHS STRINGER

STEP 3: ATTACH REMAINING TREADS TO LHS STRINGER

STEP 4: ATTACH RHS STRINGER TO TREADS

STEP 5: INSERT END CAPS

STEP 6: ATTACH STAIR MOUNTING BRACKETS

STEP 7: ATTACH STAIR TO PLATFORM

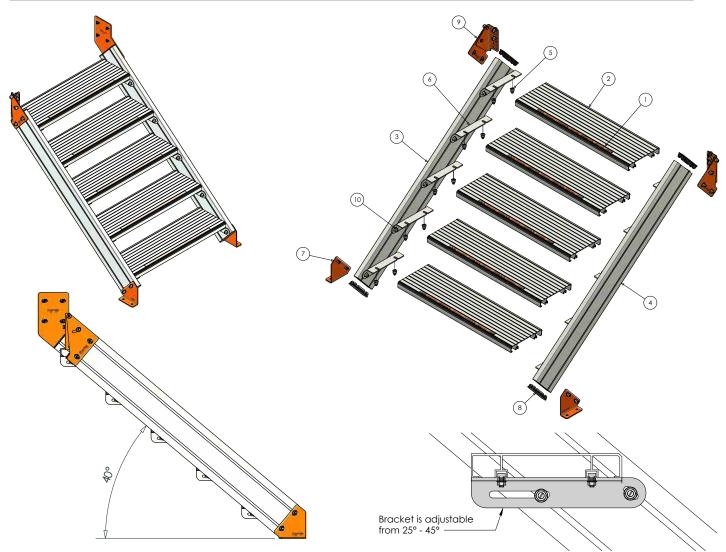

STEP 8: ATTACH STAIR FOOT & SECURE STAIR TO LANDING

Stair Assembly

MODULAR ACCESS SYSTEMS STAIR TREAD BRACKET ASSEMBLY

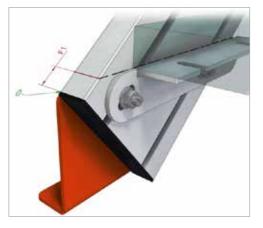

- · Align top of stair tread bracket with front and rear tread set out measurements.
- See Modular Access Systems online tread calculator, (https://Modular Access Systemsaccess.com/Modular Access Systems-stair-tread-calculator/) for measurements.
- A maximum of 18 risers per stair is allowed after which a change in direction or landing platform is required.

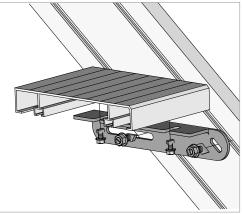

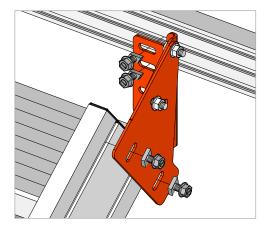

VIEW STAIR CALCULATOR

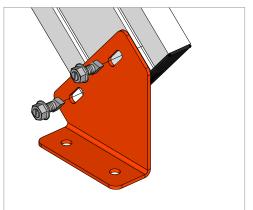

MODULAR ACCESS SYSTEMS STAIR TREAD TO STRINGER ASSEMBLY

- Align tread to the top of the angle
- Insert Modular Access Systems T-Bolt into slot on stair tread & through stringer bracket.
- Ensure stair tread is firmly against stringer.

MODULAR ACCESS SYSTEMS STAIR TO PLATFORM ASSEMBLY

- Requires 2 x Modular Access Systems T-Bolt fixings into stair stringer and platform support beam.
- Align the 'V' groove with the end of the stringer extrusion.
- The bottom edge of the bracket is to align flush with the end of the stringer extrusion.
- Only lock off adjustable bracket once the stair is in final position.

MODULAR ACCESS SYSTEMS STAIR FOOT ASSEMBLY

- Adjust stair foot to suit ground angle.
- Secure using 2 x Modular Access Systems T-Bolts into stringer.

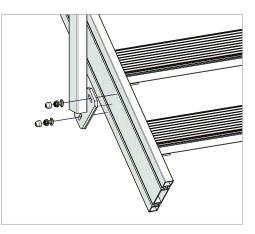

FIXING RECOMMENDATIONS INTO SUPPORT STRUCTURE:

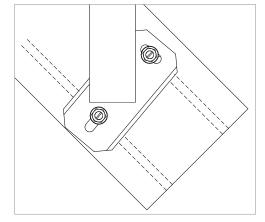

- Into steel min 2 x M8 bolts per foot.
- Into concrete min 2 x M8 x 75 screw bolts.
- Into mesh min 2 x M8 toggle bolts.

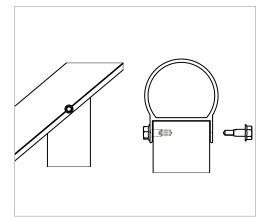

Stair Handrail Assembly

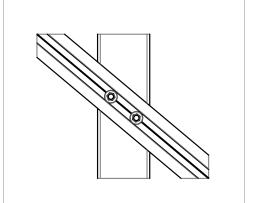

MODULAR ACCESS SYSTEMS STAIR SIDE MOUNT POST ASSEMBLY

- Each stair requires a left and right hand post.
- Posts to be positioned at a maximum of 2000mm centres.
- Post to be set vertical for any stair angle.
- The Modular Access Systems stair post angle can be adjusted to suit stairs ranging from 20° - 45° incline.
- Secure using 2 x Modular Access Systems T-Bolts into stringer.

STAIR HANDRAIL POST TOP CUT

- Stairs from 25° 35° require the top cut angle at 30° (KB602.)
- Stairs from 36° 45° require the top cut angle at 40° (KB601.)

STAIR HANDRAIL ATTACHMENT

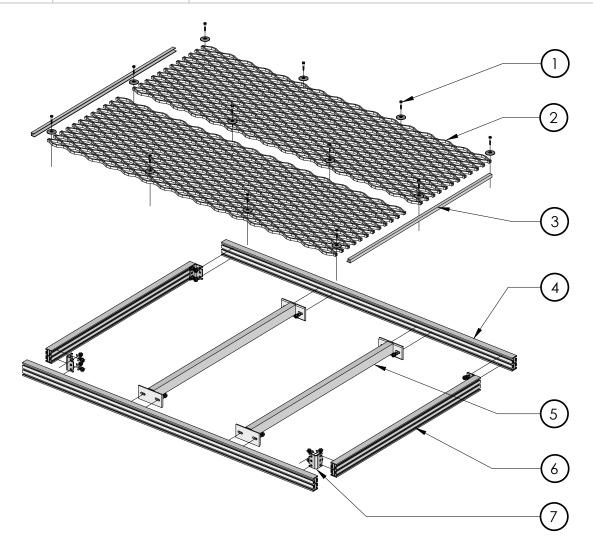

- Secure handrail to post using 2 x 16mm Tek screws.
- Insert handrail end caps and secure using 2 x 16mm Tek screws.

STAIR KNEERAIL ATTACHMENT

- Secure kneerail to post using 2 x 48mm Tek screws.
- Insert kneerail end caps and secure using 2 x 16mm Tek screws.

Platform Assembly

Modular Access Systems PLATFORM MODULE

- Modular Access Systems platforms are designed to support a live load of 2.5 kPa(250kg/m² distributed load.)
- Modular Access Systems platforms are available in three standard external width dimensions: 687mm, 992mm and 1297mm. Custom widths can be manufactured.
- Modular Access Systems platforms can be joined together to create larger decks where required.
- For dead loads such as an aircon units, pallets etc. please consult with the Modsafe design team to confirm correct configuration.

VIEW PLATFORM ASSEMBLY VIDEO

INSTALLATION REQUIREMENTS:

- Platform mesh aperture to be a maximum of 15mm where persons have access to or work beneath the platform. The GW334 narrow width deck to be used in this application.
- · Guardrail posts to be spaced at a maximum of 2000mm centres.
- · Maximum dimensions between underside of handrail to top of kneerail is 450mm.
- Platform toe board is required where an object could fall from the platform onto an area to which access by persons is a possibility. Maximum gap between toe board and deck is 10mm.

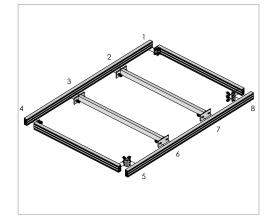

Platform Assembly

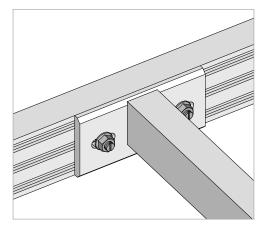

PLATFORM STRUCTURE ASSEMBLY

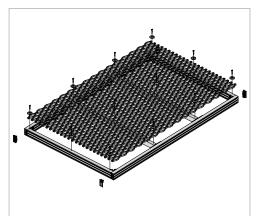

- Step 1 Attach first corner bracket to first platform beam.
- Step 2 & 3 Attach platform cross supports to platform beam.
- Step 4 Attach second corner bracket to platform beam.
- Step 5 Attach third corner bracket to second platform beam.
- Step 6 & 7 Attach platform cross supports to second platform bracket.
- Step 8 Attach fourth corner bracket to second platform bracket.
- Step 9 & 10 Attach end platform supports.

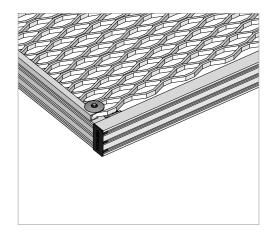

PLATFORM CROSS SUPPORT ASSEMBLY

- Secured to platform structure using 2 x Modular Access Systems T-Bolts.
- Top of cross support to be level with platform beam.
- Space cross supports at a maximum of 600mm centres.

ALUMINIUM DECK ASSEMBLY

- Fix aluminium mesh deck to cross supports using 12 14 x 35mm Tek screws with fixing disc.
- 3 fixings required for each cross support. Use centre fixing to secure both panels.
- For non standard platforms, aluminium mesh will need to be trimmed to fit.

ALUMINIUM DECK EDGE BAR ASSEMBLY

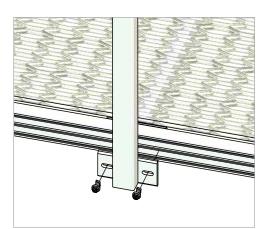

- The mesh edge bar is secured by ensuring the fixing disc captures the edge bar when tight.
- Secure edge bar with 3 x fixing discs.

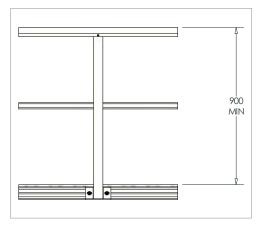

Guardrail Assembly

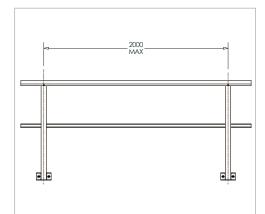

POST GUARDRAIL ATTACHMENT

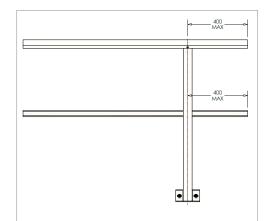

• Secure post to platform using 2 x Modular Access Systems T-Bolts.

NOTE: Two bolts to locate into centre slot of Modular Access Systems 80 beam for maximum stability.

PLATFORM GUARDRAIL HEIGHT

• Standard height to top of Modular Access Systems guardrail from top of platform is 1100mm.

PLATFORM GUARDRAIL SPACING

• Maximum spacing between posts is 2000mm.

GUARDRAIL & KNEERAIL CANTILEVER

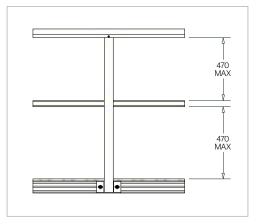

• When positioning posts, the maximum unsupported length of the handrail and kneerail is 400mm.

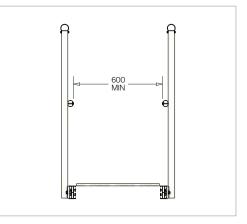

Guardrail Assembly

GUARDRAIL & KNEERAIL SPACING

• Maximum spacing between guardrail and kneerail is 470mm.

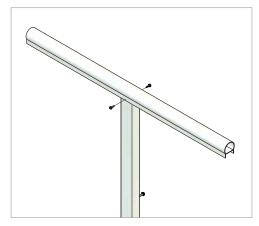

NOTE: Guardrail higher than 1100mm above the deck will require second kneerail to be added to ensure spacing between rails does not exceed 470mm.

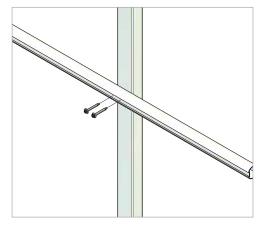

• Minimum opening between rails (measured between kneerails) is 600mm. This is to ensure compliance with British Standard BS14122. Can close down to 500mm to miss obstacle and platform less than 2m long.

GUARDRAIL (TOP RAIL) ATTACHMENT

• Guardrail attaches to post using 2 x 16mm Tek screws.

KNEERAIL ATTACHMENT

• Kneerail attaches to post using 2 x 48mm Tek screws.

Guardrail Assembly

KNEERAIL ELBOW ATTACHMENT

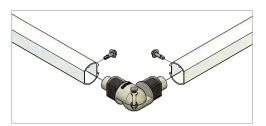

END CAP ATTACHMENT

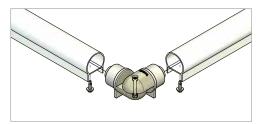

- Elbow inserts into extrusion and is secured using 1 x 16mm Tek screw each side.
- Ensure hinge screw in elbow is tightened to provide rigidity.

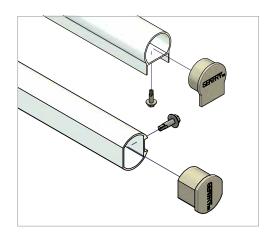

GUARDRAIL (TOP RAIL) ELBOW ATTACHMENT

- Elbow inserts into extrusion and is secured using 1 x 16mm Tek screw each side.
- Ensure hinge screw in elbow is tightened to provide rigidity.

• Insert end caps to extrusions and secure using 1 x 16mm Tek srew.

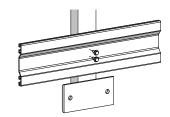

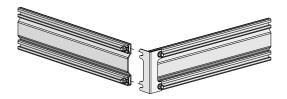

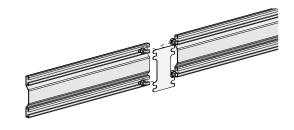

TOE BOARD ATTACHMENT & ASSEMBLY

• Toe board attachment to guardrail post using 2 x 20mm Tek screw.

• Toe board corner connection using 2 x M8 x 35mm cup head bolts.

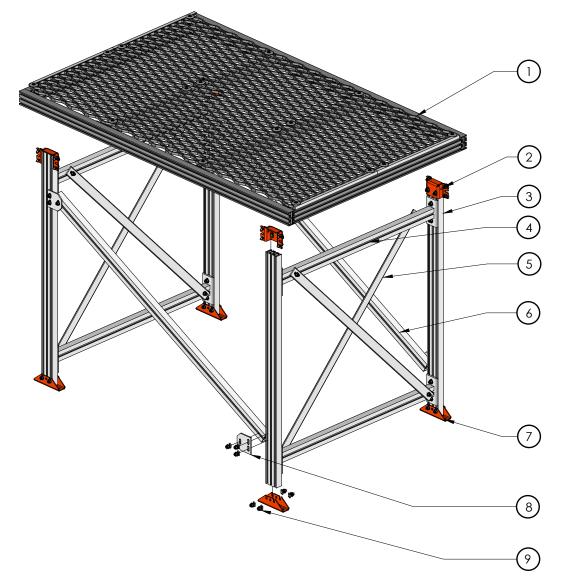

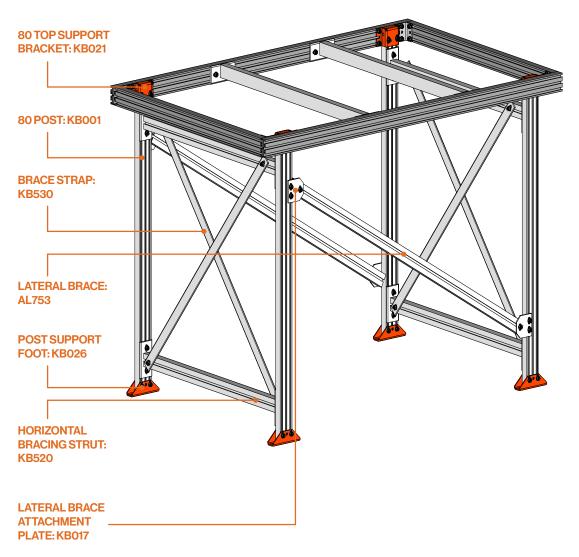

• Toe board mid span connection using 4 x M8 x 35mm cup head bolts.

POST SUPPORT MODULE

- Modular Access Systems post support structure is designed to support a live load of 2.5 kPa (250kg/m²).
- Modular Access Systems supports are available in three standard widths 610mm, 915mm & 1220mm.
 Custom widths can be manufactured.

STEP 1: ATTACH BASE SUPPORT FOOT TO SUPPORT LEGS

STEP 2: ATTACH 80 TOP BRACKET TO SUPPORT LEGS

STEP 3: ATTACH LOWER HORIZONTAL BRACE

STEP 4: ATTACH TOP HORIZONTAL BRACE

STEP 5: ATTACH BRACE STRAPS TO HORIZONTAL BRACES

STEP 6: ATTACH PLATFORM TO SUPPORT MODULES

STEP 7: ATTACH LATERAL BRACE SUPPORTS

INSTALLATION REQUIREMENTS:

- See bracing configuration tables for set out of horizontal braces, bracing straps and lateral braces.
- Lower horizontal brace strut KB520 is set at 150mm above bottom of post.

POST SUPPORT MODULE

- Post support modules are available in the following sizes:
 - Width: 610mm, 915mm, 1220mm.
 - Height: 600mm to 6000mm in 200mm increments.
- A series of cross braces are required depending on height of platform see bracing configuration table.
- Assemble complete post support module ready to mount to platform.

HORIZONTAL BRACE STRUT ASSEMBLY

POST SUPPORT FOOT ASSEMBLY

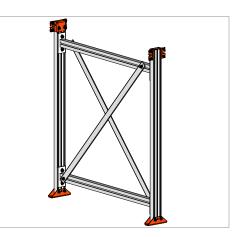

requirements.

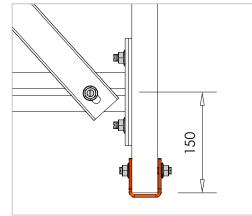

- Secure to post using 2 x Modular Access Systems T-Bolts.
- Position lower horizontal brace 150mm above bottom of post.
- Position brace straps as close to post as possible for maximum platform stability.

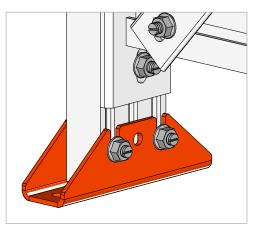

Secure to post using 4 x Modular Access Systems T-Bolts, two either side of foot.

Support foot to be secured to ground structure in accordance with engineer's

• Secure brace strap using 1 x Modular Access Systems T-Bolt.

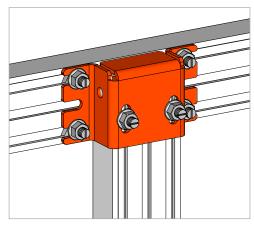

POST TOP SUPPORT BRACKET ASSEMBLY

- Modular Access Systems 80 top support bracket secured using 2 x Modular Access Systems T-Bolts into post and 4 x Modular Access Systems T-Bolts into platform.
- Should this bracket be required to support a suspended platform a clearance hole is to be drilled through the post extrusion using the bracket suspension hole. An M10 bolt is recommended for use.

٠

POST SUPPORT TO PLATFORM ASSEMBLY

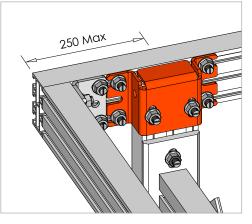

- Attach assembled post support module to platform.
- For smaller platforms, invert platform and drop support module into platform.
- Secure post support bracket to platform using 4 x Modular Access Systems T-Bolts.

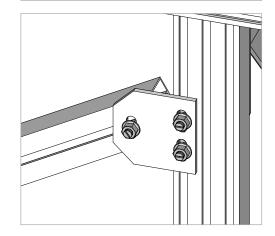

POST SUPPORT MODULE POSITIONING

POST SUPPORT LATERAL BRACING ASSEMBLY

• Position post support module as close as possible to corner bracket but no more than 250mm from centre of post to outside edge of platform.

LATERAL BRACE ATTACHMENT

• Attach lateral brace to connector plate using 1 x Modular Access Systems T-Bolt.

The MODULAR ACCESS SYSTEMS lateral brace provides platform stability

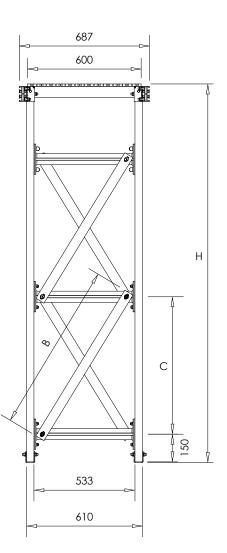

- Secure lateral brace to post using 2 x Modular Access Systems T-Bolts.
- See lateral brace configuration table for brace set out.

Post Support Bracing Layout

600 SERIES BRACING LAYOUT

- Step 1: Identify correct post height.
- Step 2: Determine correct post support kit and required quantity.
- Step 3: Assemble post support bracing as per table below.

Post Support Layout

POST SUPPORT SPACING

- Modular Access Systems platforms are designed to support a live load of 2.5kPa (250kg/m²)
- Calculations assume maximum flooring mass of 12kg/m2 (weight of guardrail and aluminum deck).
- Allowance for floor vibration has not been taken into account in design.
- Platform deflection has been based on two variables, frequent access (less deflection) and infrequent access (greater deflection). Table below shows post spacings based on above.
- Lateral bracing is required as per configuration table.

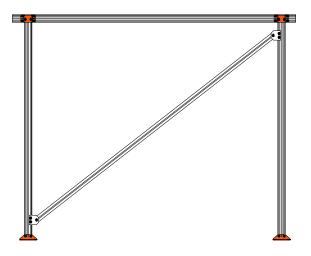

NOMINAL WIDTH	POST SUPPORT SPACING - To support 2.5kPa (AS/NZS 1657)
USING Modular Access Systems 80MM PLATFORM BEAM	
600 SERIES (W) PLATFORM	3300mm Max Post Support Spacing
900 SERIES (W) PLATFORM	2700mm Max Post Support Spacing
1200 SERIES (W) PLATFORM	2500mm Max Post Support Spacing
USING MODULAR ACCESS SYSTEMS 180 PLATFORM BEAM	
600 SERIES (W) PLATFORM	6000mm Max Post Support Spacing
900 SERIES (W) PLATFORM	5500mm Max Post Support Spacing
1200 SERIES (W) PLATFORM	5100mm Max Post Support Spacing

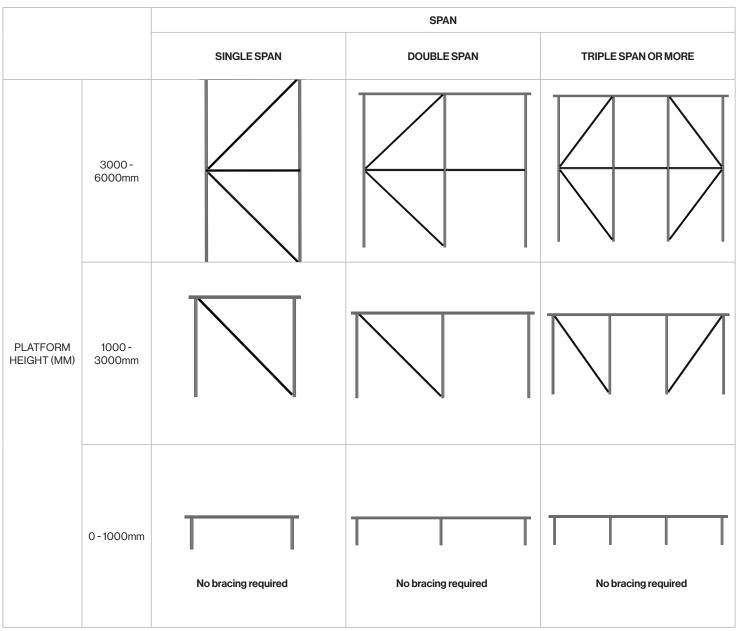

NOTE: Deflections limited to L/100

Lateral Brace Layout

LATERAL BRACE INSTALLATION

- Modular Access Systems platform propriety design allows freestanding platform of up to 6000mm.
- Platforms above 3000mm require a horizontal brace midspan of the post in all bays.
- For longer platforms exceeding triple span, up to 30m, lateral bracing is required in the first and last bay only.
- For longer platforms from 30m 50m, lateral bracing is required in the first, centre and last bay only.

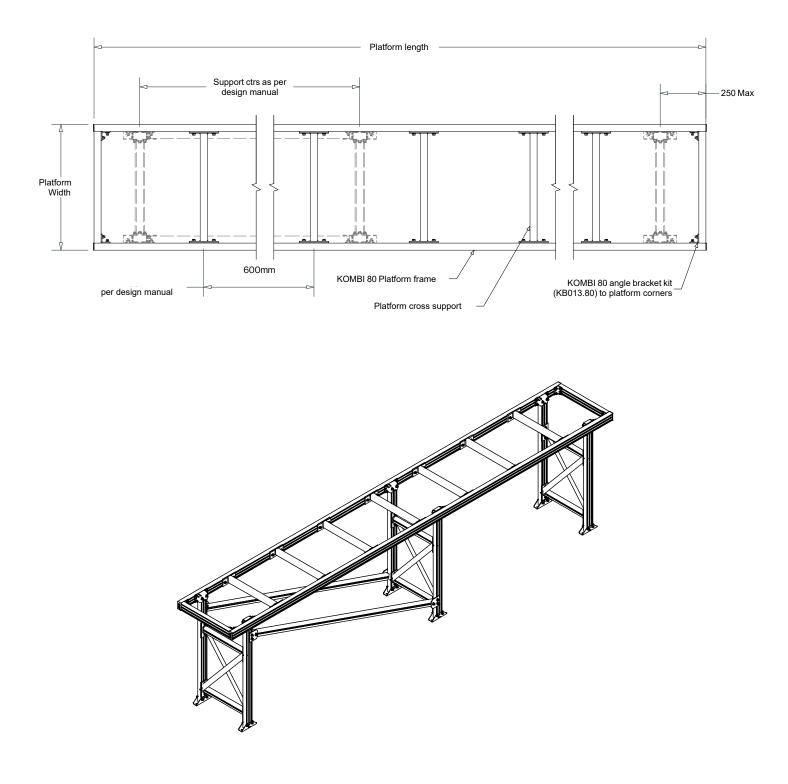

Platform Configuration

PLATFORM SET OUT GUIDELINES

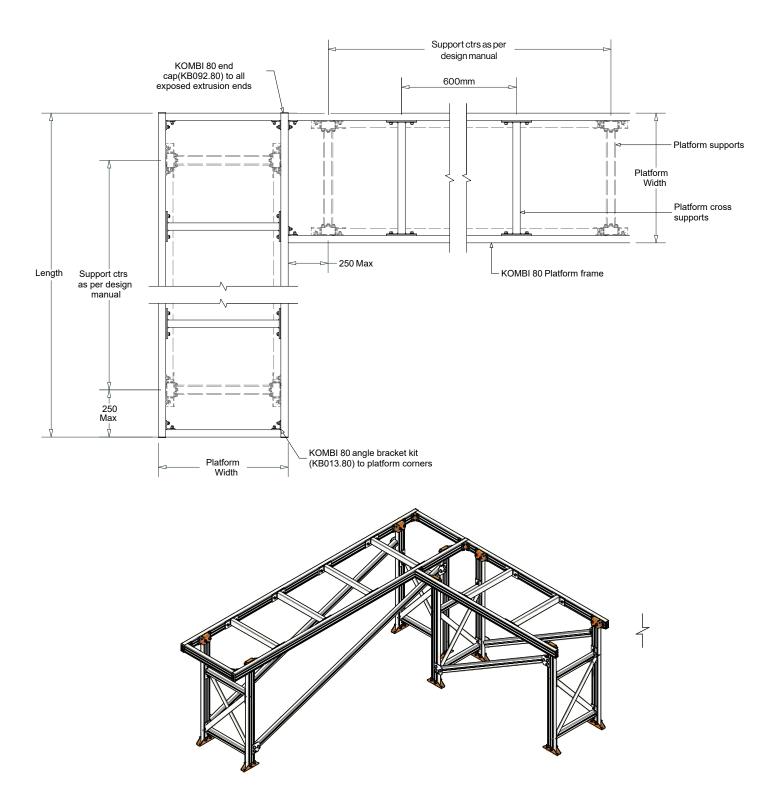

- Platform cross supports positioned at 600mm centres.
- Post supports positioned as close to end of platform as possible, (250mm max from outside edge of platform to centre of post).

Platform Configuration

PLATFORM SET OUT GUIDELINES

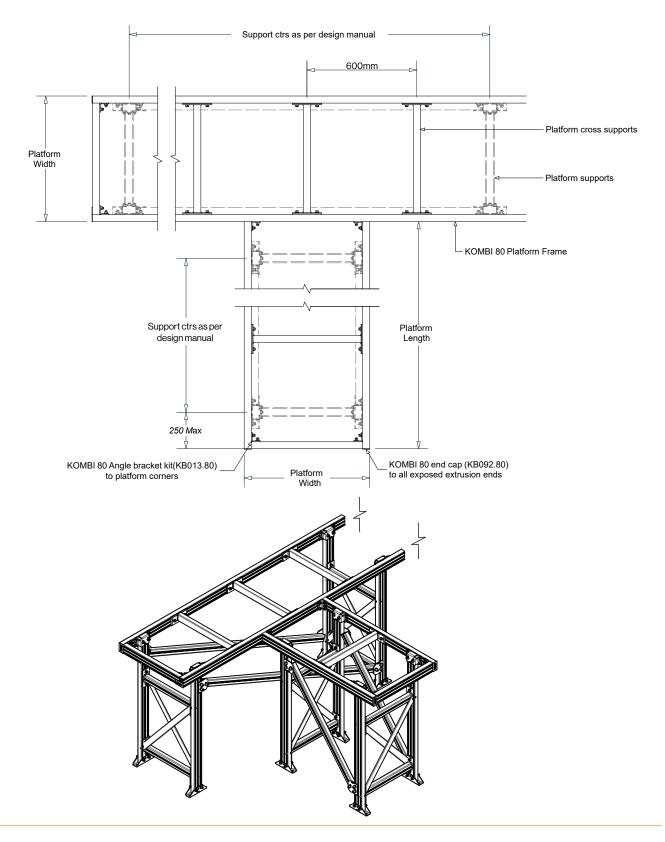

- Platform cross supports positioned at 600mm centres.
- Post supports positioned as close to end of platform as possible, (250mm max from outside edge of platform to centre of post).

Platform Configuration

PLATFORM SET OUT GUIDELINES

- Platform cross supports positioned at 600mm centres.
- Post supports positioned as close to end of platform as possible, (250mm max from outside edge of platform to centre of post).

Technical Statement

CRITERIA	DATA	NOTES				
ALUMINIUM EXTRUSION						
Modular Access Systems 180	Aluminium Grade 6005A-T5	Size - 180 x 32mm				
Modular Access Systems 80	Aluminium Grade 6005A-T5	Size - 80 x 38.5mm				
Modular Access Systems 60	Aluminium Grade 6106-T6	Size - 58.5 x 38.5mm				
Bracing Straps	Aluminium Grade 6106-T6	Size - 50 x 6mm				
Walkway Mesh	Aluminium Grade 6106-T6	Size - 600 x 13mm				
Handrail	Aluminium Grade 6106-T6	Size - 50 x 57mm				
Kneerail	Aluminium Grade 6106-T6	Size - 40 x 34mm				
Toe Board	Aluminium Grade 6106-T6	Size - 120 x 13mm				
Stainless Steel Brackets	Stainless Steel Grade 316					
Aluminium Brackets	Aluminium Grade 5083-T5					
PLATFORMLOADINGS						
Live Load	2.5kPa	In accordance with AS 1657:2018.				
Concentrated Loading	1.1kN	Applied through 100 x 100 pad at any point.				
Mesh Slip Rating	R11					
Max Free Standing Height	6000mm	Subject to MODSAFE technical advice.				
Platform Support Spans	Modular Access Systems 80 SERIES 600 Series (W) Platform - 3300mm max spacing 900 Series (W) Platform - 2700mm max spacing 1200 Series (W) Platform - 2500mm max spacing Modular Access Systems 180 SERIES 600 Series (W) Platform - 6000mm max spacing 900 Series (W) Platform - 5500mm max spacing 1200 Series (W) Platform - 5100mm max spacing	Deflection limited to the span length divided by 100.				
Platform Mesh Openings	Personnel access under platform.	Where personnel is required to access underneath platform narrow mesh (GW334) must be used.				
STAIR LOADINGS						
Live Load	2.5kPa	Applied to tread and landing.				
Deflection	L/100 or 40mm	Whichever is the lesser.				
Tread Loadings	2.2kN per lineal metre or a concentrated loading of 1.5kN.	In accordance with AS 1657:2018 Section 7.1.1.				
Max Stair Treads	17 treads, 18 risers	In accordance with AS 1657:2018.				
Stair Widths	Max 1500mm wide					
Stair Angles	26 degrees to 44 degrees	Ideal angle is 40 degrees. Angle can be increased to reduce footprint.				
Stair Risers	Riser - $130 \le R \le 225$ Going - $215 \le G \le 355$ Combination = $540 \le (2R + G) \le 225$	All risers and goings in the same flight of stairs shall be of uniform dimensions within a tolerance of <u>+</u> 5mm.				
Limitations Of Use	Not suitable for BCA / NCC stair design.					

Technical Statement

CRITERIA	DATA	NOTES				
DESIGN WIND CRITERIA						
Region	A1					
Regional Gust Wind Speed	V100 = 41m/s					
Terrain Category	2					
Topographical Multiplier	MT = 1.0					
Terrain/Height Multiplier	Mzcat = 0.96					
Shielding Factor	MS = 1.0					
FASTENERS						
Material	Stainless Steel 316					
Modular Access Systems T-Bolt Fixing	M10 x 25mm, 316 SS					
Modular Access Systems Nut Torque	25Nm					
HANDRAIL						
Platform Guardrail Post Spacing	2000mm Max					
Max Handrail Height	1000mm	Typically 987mm standard from deck to top of handrail				
Kneerail Height Below Top Rail	450mm from top of kneerail to underside of kneerail.					
Platform Toe Board	Use Modular Access Systems GW320 100mm high	Required if an object could fall from a platform or landing onto an area to which access by persons is available.				
Platform Flooring Mass	12kg / m2. This includes platform and handrails.					
Limitations Of Use	Not suitable for BCA / NCC stair design.					
DISSIMILAR METALS						
Aluminium To Concrete	To be painted with a bitumen paint.					
Aluminium To Roof Deck	Shall be separated with EPDM tape.					
Aluminium to Stainless Steel	Brackets to be powder coated or EPDM separated.	Note this does not apply to fasteners. Ref AS/NZS 1664.1:1997 Section 5.1				

Maintenance

The Modular Access Systems system requires very little maintenance, however installed systems should be inspected at 12 monthly intervals using the checklist below.

This checklist outlines the key checking criteria required to ensure the safe on-going use of this system. Any other items of concern not shown on the checklist, must be in the noted in the maintenance report and brought to the attention of the person in control of the workplace.

Items marked **YES** means they conform with the required checking criteria and are suitable for normal use until the next inspection. System data plates must be updated showing current check date and next check date.

Items marked **NO** means they do not conform to the required checking criteria. These items must have the required corrective actions put in place. The maintenance report must clearly document all non-conformance criteria.

SYSTEM MAINTENANCE CHECKLIST

COMPONENT	INSPECTION CRITERIA	PASS Y/N	CORRECTIVE ACTION	COMPLETION DATE
	1. No signs of deformation, deterioration or damage to platform, post support, stair and gaurdrail modules.			
R AN	2. All system connections in place and secure.			
	3. System is being used for its intended pupose and is not supporting an undesigned load.			
<u>)</u>	4. All bolts are in place and secure. Ensure that slots on all bolts are perpendicular to the extrusion slot and tightned to 60 NM.			
	5. There is no build up of soil or contaminants at the base of the system or any part of it in water.			
6	6. Handrail components and connection to structure secure.			
A. A.	7. Walkway surface and steps clear of all debris or build up of any dirt or grime.			
	8. System data label attached and clearly visible All data filled out including last and next inspection date.

Technical Specification

SYSTEM CODE	MODULAR ACCESS SYSTEMS SUPPORT STRUCTURE, PLATFORM & STAIR SYSTEM KB6000
TECHNICAL DATA	MATERIALS Manufactured from high grade structural aluminium Modular Access Systems fixing brackets, joining plates and support feet manufactured from profiled stainless steel plate powder coated burnt orange Modular Access Systems T-Bolt manufactured from stainless steel
	DIMENSIONS Modular Access Systems 80 extrusion: 80 x 38mm Modular Access Systems 180 extrusion: 180 x 32mm Platform support extrusion: 58 x 58mm Stair tread: 250 x 40mm Handrail post extrusion: 58 x 38mm Aluminium expanded mesh: 600 x 13mm
	FIXINGS Modular Access Systems T-Bolt: M10 x 25 Tek screw: 12g stainless steel
	WEIGHT Modular Access Systems 80 extrusion: 2.6kg/m Modular Access Systems 180 extrusion: 4.0kg/m Modular Access Systems platform deck (aluminium mesh only - 600mm wide): 4.2kg/m ² Modular Access Systems stair tread: 3.9kg/m
	WORKING LOAD LIMIT Modular Access Systems platforms are designed to AS1657-2018 (Platform live load limit 2.5kPa) Modular Access Systems stairs are designed to AS1657-2018 (Stair live load limit 2.5kPa) Platform deflection is limited to L/100 Deflection based on a uniformly distributed load combination of dead load + 0.7 live load.
COMPLIANCE	Modular Access Systems are designed to comply with requirements of Work at Height Regulations BS5395: Part 3 and EN: 14122.
TESTING	Testing and performance based on requirements of of Work at Height Regulations BS5395: Part 3 and EN: 14122.
PRODUCT WARRANTY	10 years from date of purchase subject to correct configuration and installation. Use and maintenance to be in accordance with manufacturer's specifications and recommendations.
INSPECTION AND MAINTENANCE	Inspection required every 12 months by competent person in accordance with manufacturer's specifications and requirements of of Work at Height Regulations BS5395: Part 3 and EN: 14122.
IMPORTANT NOTE	Failure to supply and/or install proprietary product in accordance with above standards and codes, specifications and instructions voids complete system certification and/or warranty.
